

FACET

CEILING ATTACHMENT OPTIONS

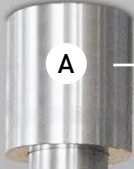

bloomming

# FACET

## Ceiling Attachment Option #1

Distance between ceiling and top of screen  
**23cm**

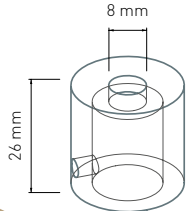

**A**

**B**

### Attaching your Facet divider to the ceiling is easy.

Attach part **A** of the attachment element in one straight line (if multiple ceiling attachments) against the ceiling with a hart-to-hart distance of 340 mm. The amount of elements depend on the width of your divider (one element for each 340mm).

Use the right fastening materials for the right ceiling. Fastening materials (screws) not included due the diversity in ceiling- constructions and materials.

The last step is to place part **B** in part **A** and secure with an allen key.

**C**

Facet comes standard with Ceiling Attachment Option #1. If you prefer one of the other options please contact Bloomming.

# FACET

## Ceiling Attachment Option #2

Distance between ceiling and top of screen  
1-5cm

A

B

C

With this option it is possible to attach the screen directly to a ceiling.

A plain stainless steel screw-hook replaces part A+B.

Facet comes standard with Ceiling Attachment Option #1. If you prefer one of the other options please contact Blooming.

FACET

## Ceiling Attachment Option #3

15mm

13mm

### Subtle.

In this option part **A+B+C** (see previous pages) are replaced by a subtle stainless steel 0.8mm thick wire + small ceiling attachment + adjustment system to adjust the length of the cable. The adjustment system is hidden in the top facet.

The maximum length of the cable is 200cm.

Use the right fastening materials for the right ceiling. Fastening materials (screws) to attach the upper part to the ceiling are not included due to the diversity in ceiling-constructions and materials.

Distance between ceiling  
and top of screen  
**1-185cm**

Facet comes standard with Ceiling Attachment Option #1. If you prefer one of the other options please contact Blooming.
